¹The classification based on phylogenetic relationships elucidated by Reinert *et al.* (2004, 2006, 2008, 2009).

²The classification of Aedini recognised in *A Catalog of the Mosquitoes of the World* (Knight & Stone, 1977) and its supplements (Knight, 1978b; Ward, 1984, 1992), including taxa more recently recognised as subgenera within the broad traditional concept of genus *Aedes*.

³Genus and species unknown prior to Harbach *et al.* (2007).
