Zeugomyia		Zeugomyia		Zeugomyia	Zeugomyia

¹The classification based on phylogenetic relationships elucidated by Reinert *et al.* (2004, 2006, 2008, 2009).

²The classification of Aedini recognised in *A Catalog of the Mosquitoes of the World* (Knight & Stone, 1977) and its supplements (Knight, 1978b; Ward, 1984, 1992), including taxa more recently recognised as subgenera within the broad traditional concept of genus *Aedes*.

³Classification proposed by Wilkerson *et al.* (2015), with addition of subsequently described *Pseudalbuginosus*, to retain the generic-level taxa of Reinert *et al.* (2009) within a highly polyphyletic genus *Aedes*; also, later changes by Wilkerson & Linton, 2015.
