

Collection Records of the Project "Mosquitoes of Middle America"

8. Central America: Belize (BH), Guatemala (GUA), El Salvador (SAL),
Honduras (HON), Nicaragua (NI, NIC)¹Sandra J. Heinemann and John N. Belkin²

For general information and collections from the Dominican Republic (RDO) the first publication of this series should be consulted (Belkin and Heinemann 1973). Any departure from the method in this publication is indicated below. Publications 2-6 of the series (Belkin and Heinemann 1975a, 1975b, 1976a, 1976b, 1976c) recorded data on collections from the remainder of the West Indies except Jamaica (Belkin, Heinemann and Page 1970: 255-304) and the islands adjacent to Venezuela as well as Trinidad and Tobago (to be covered later).

Publication 7 on collections from Costa Rica (Heinemann and Belkin 1977) began treatment of Central America. In the present publication, the rest of nuclear Central America is covered. The extensive collections in Panama (including Canal Zone) and Mexico will be treated separately in 2 publications.

The majority of the collections from Central America treated in the present publication were made expressly for the project. Several important collections were made available to the project. We are greatly indebted to Prof. D. S. Bertram for making available to us nearly all the collections recorded here from Belize, formerly British Honduras. We thank also the following for collections from the specified areas: Herbert T. Dalmat, Guatemala; Joseph R. Austin and Richard F. Darsie, Jr., El Salvador; Marco E. C. Giglioli, Honduras; Timothy W. Brown, Nicaragua. All the specimens bear the characteristic locality labels of the project indicating the Code and Number. These labels are easily recognized by the last line /Mosq Mid Amer/, with only one exception for code NI where it is /Gorgas Mem Lab/.

As noted in Collection Records 7 (Heinemann and Belkin 1977) various errors in previous publications of the project have been rectified in the present publication; also, most of the identifications are preliminary identifications only and in no way constitute a change in taxonomic status.

(formerly British Honduras)

Code: BH

The collections from Belize available to the project are identified by one of the following 2 printed labels. Collections made under the supervision of D. S. Bertram during an investigation on the mosquitoes of British Honduras (Bertram 1971) bear the label: //BH [handwritten L1-A500]/Br. Honduras 67-68/Mosq Mid Amer//. Collections made expressly for the project by Donald and Karen Schroeder bear the label: //BH [handwritten 501-508]/Br Honduras 70-71/Mosq Mid Amer//. For the Bertram collec-

tions the original numbering and lettering has been preserved throughout.

The location of a collection was plotted on map British Honduras 1:800,000, Directorate of Overseas Surveys, ed. 2, 1965 and map Central America 1:250,000, series E552, sheets 1 and 2, ed. 2-GSGS (DOS649). The localities, elevations and grid coordinates were determined on following maps: Central America 1:250,000, series E503, sheet NE16-9, ed. 1-AMS; and World 1:250,000, series 1501, sheets NE 16-9, 16-10, 16-13, ed. 1-GSGS. The U.S. Board on Geographic Names gazetteer for British Honduras, 1956 was used for the location and spelling of some localities.

GUATEMALA
Code: GUA

The collections from Guatemala available to the project are identified by the following printed label: //GUA [handwritten 1-151]/Guatemala 64-65/Mosq Mid Amer//. Collections 1-131 have an unmodified label and were made expressly for the project by the individuals listed below under Summary of Collections. Collections 134-151 have 64-65 deleted and 50 written above; these collections were made under the supervision of Herbert T. Dalmat incidental to the investigations on the black flies of Guatemala (Dalmat 1955); they are accompanied by very doubtful data.

A variety of maps were used in determining the location of collection sites: Mapa Preliminar de la Republica de Guatemala 1:750,000, Direccion General de Cartografia, 1959; Guatemala's General Guide [map of Guatemala City] 1:25,000, Instituto Geografico Nacional, 1965. For localities and their elevations use was made of World (North America) 1:1,000,000, series 1301, sheet ND15, ed. 1-AMS, 1935. For localities, elevations and grid coordinates the following maps were used: Central America 1:250,000, series E503, sheets ND15-4, 15-7, 15-8, 15-12, 16-1, 16-5, ed. 1-AMS, ed. 2-AMS (ND15-7); World 1:250,000, series 1501, sheets ND15-4, 15-7, 15-8, 16-1, 16-2, ed. 1; Guatemala 1:50,000, series E754, several sheets, ed. 1-AMS. The U.S. Board on Geographic Names gazetteer no. 94, Guatemala, 1965 was used for the location and spelling of some localities.

EL SALVADOR

Code: SAL

The collections from El Salvador available to the project are identified by one of 3 printed labels: //SAL [handwritten 1-19]/El Salvador 64-65/Mosq Mid Amer// for collections 1-10 made expressly for the project by A. Quinonez and collections 11-19 made by cooperator J. Austin; //SAL [handwritten 20-47]/El Salvador 66-67/Mosq Mid Amer// for collections made by cooperator J. Austin; and //SAL [handwritten 48-56]/El Salvador 7/Mosq Mid Amer// for collections made expressly for the project by J. N. Belkin and cooperator S. G. Breeland and for material received from cooperator R. F. Darsie. See Summary of Collections below for the dates and general areas where these collections were made.

The localities, elevations and grid coordinates were determined from the following maps: World 1:250,000, series 1501, sheets ND16-9, 16-10, ed. 1; El Salvador 1:50,000, series E753, several sheets, ed. 1-AMS. The U.S. Board on Geographic Names gazetteer for El Salvador, 1956 was used for the location and spelling of some localities.

HONDURAS

Code: HON

The collections from Honduras available to the project are identified by one of 3 printed labels: //HON [handwritten 1-61]/Honduras 64-65/Mosq Mid Amer// for collections made expressly for the project by V. P. Cowsill and A. Quinonez; //HON [handwritten 62-93]/Honduras 67-68/Mosq Mid Amer// for collections made expressly for the project by A. J. Adames; and //HON [handwritten 95-146]/Honduras 7/Mosq Mid Amer// for collections 95-124 made expressly for the project by D. and K. Schroeder and for collections 130-146 provided by cooperator M. E. C. Giglioli. See Summary of Collections below for the dates and general areas where these collections were made.

The location of a collection was determined in some instances on map Central America 1:250,000, series E501, sheets ND16N-2, -3, ed. 1-AMS, 1934. In other instances the location, as well as the elevation and grid coordinates were determined on World 1:250,000, series 1501, sheets ND16-2, 16-6, NE16-15, ed. 1 and Honduras 1:50,000, series E752, sheet 2662-3, ed. 1-AMS, 1963. The U.S. Board on Geographic Names gazetteer for Honduras, 1956 was used for the location and spelling of some localities.
