GEOGRAPHIC DISTRIBUTION OF THE MOSQUITOES OF ARGENTINA	287
BIBLIOGRAPHY OF THE MOSQUITOES OF ARGENTINA	336
INDEX FOR PARTS I AND II	357

ABSTRACT

Distributional data are presented for 208 species occurring in Argentina, 2 species for which records apparently are based on misidentifications, and 1 species that no longer is found there. Data are organized by province or, in the case of Tierra del Fuego, by national territory. The relationship of the mosquito fauna of Misiones Province to that of Brazil is documented, and attention is drawn to the depauperate mosquito fauna of the Patagonian Region of Argentina. Literature citations or collection records, or both, are given to document the occurrence of each species in a particular province or territory. A comprehensive bibliography is provided.

INTRODUCTION

Epizootics of equine encephalitis have swept through the Argentine Pampa at irregular intervals with devastating results (Sabattini et al. 1985). Attempts to clarify vector relationships of the responsible viruses have been hampered by the lack of appropriate identification keys to the female mosquitoes and the lack of a ready source of information concerning species composition and distribution in the affected areas. For example, 23.3% of 313,233 mosquitoes collected during 1977-80 could only be identified as *Culex* (*Culex*) species (Mitchell et al. 1985b). The present publication and the preceding one are intended to serve as a basis for rectifying some of these problems.

Existing distribution lists of the mosquitoes of Argentina are outdated (Castro et al. 1959 (1960); Duret 1950a, 1950c, 1951a,b,c, 1952). The most recent (Castro et al. 1959 (1960)) lists only 158 species. The catalog of Knight & Stone (1977) and the two supplements to the catalog (Knight 1978, Ward 1984) brought the total to 169 species. The following distribution list includes an additional 39 species, thus bringing the total to 208. The distribution lists by Duret (op. cit.) served as the starting point for the present compilation. With few exceptions, our literature survey encompassed publications appearing since 1951. Although political boundaries make poor zoogeographic markers, they do serve as ready reference points for discussing distribution patterns that are distinctive and for approximating the distribution of species that have been poorly studied. Therefore, the following distributional data are organized by political province, or, in the case of Tierra del Fuego, by national territory. Distinctions are not made between the federal capital and the province of Buenos Aires, since species that occur in the city probably occur in the province as well.

Argentina extends from the Tropic of Capricorn to southern latitudes comparable to those of southeastern Alaska in the northern hemisphere, and from the South Atlantic seashore to Aconcagua (6,964 m.) the highest peak in the western hemisphere. The environmental variety provided by such diversity in climate and physiography is reflected in the composition of the mosquito fauna. Misiones Province in the northeast (Fig. 1-A) has a tropical fauna more akin to that of southern Brazil than to other parts of Argentina. One hundred and thirty mosquito species have been recorded from Misiones (Table 1); 60 of these have not been found elsewhere in Argentina. Therefore, only 70 species (54%) of Misiones' fauna are shared with other parts of the country. In contrast, at least 115 species (88%) are shared with Brazil.

Few mosquito species have been recorded in the tier of provinces bordering Chile along the Andes from Catamarca southward (Fig. 1-B). This is true also for San Luis and La Pampa Provinces. Despite the absence of records in the literature, a few mosquito species undoubtedly occur in La Pampa Province, such as the ubiquitous *Aedes albifasciatus* and members of the *Culex pipiens* complex. Patagonia, which stretches through 1,000 miles (1,609 km.) of latitude from the Colorado River (the northern border of Rio Negro and Neuquen Provinces) to the Beagle Channel, south of Tierra del Fuego, has a depauperate mosquito fauna (Fig. 1-B). Only eight species are known from this vast area;

three species of *Aedes* (*Ochlerotatus*) and five species of *Culex* (*Culex*) (Table 1). The tip of South America represents the southernmost continental extension with the exception of Antarctica. Tierra del Fuego falls within the range of latitude of the more southern major subantarctic islands: South Georgia, Heard, and Macquarie. None of the latter three islands have mosquitoes; therefore, the records of *Ae. albifasciatus* from Tierra del Fuego (Bachmann & Bejarano 1960, Forattini et al. 1970) probably indicate that this is the southernmost area in the world where a mosquito species is permanently established.

Three species listed in the text are not known to occur in Argentina. *Aedes aegypti* has not been established in Argentina since the eradication campaign passed to the vigilance stage in 1963 (Carcavallo & Martinez 1968a); however, in view of its public health importance, it seems prudent to list previous distribution records. *Aedes aegypti* is present in neighboring Paraguay and Bolivia. Argentine records for two additional species, *Culex infictus* and *Mansonia pessoaai*, appear to be based on misidentifications; however, inclusion of distribution records for these species seems warranted. None of the aforementioned three species are included in the species total for Argentina (208) or in other statistical data.

All distributional data are from the published literature with two exceptions. A few unpublished records of collections made by one of the authors (CJM) and Ms. Liliana Buffa, Catedra de Entomologia, National University of Cordoba, also are included.

The following bibliography serves for this and Part I of this series. An attempt was made to review all relevant literature published since the distribution lists by Duret (op. cit.) were prepared, but we also have included older literature citations as well as other publications dealing with Argentine mosquitoes. Therefore, not all of the publications listed in the bibliography are cited in the text; however, we feel that it is worthwhile to have a reasonably comprehensive bibliography for the mosquitoes of Argentina published as a unit.

ACKNOWLEDGMENTS

We express our appreciation to the following individuals for their assistance with this project: Dr. Jose P. Duret, Medico (Retired), Buenos Aires, for providing reprints of his extensive contributions to the literature on Argentine mosquitoes; Dr. Ronald A. Ward, Walter Reed Army Institute of Research, Washington, DC, for copies of his published bibliographies on South American mosquitoes; Mr. Ray E. Bailey, Division of Vector-Borne Viral Diseases, Fort Collins, CO, for adapting distributional data, gleaned from the literature by the senior author, into a computer program compatible with Mrs. Galyardt's word processor; Mrs. Patsy Galyardt, Division of Vector-Borne Viral Diseases, Fort Collins, CO, for patiently and cheerfully typing multiple drafts of a bibliography largely in a language she does not understand, and for typing and incorporating the notes sections into the text; Professora Mireya Brewer, Ms. Liliana Buffa, and Mr. Walter Almiron, Catedra de Entomologia, National University of Cordoba, for standardizing abbreviations of Spanish language periodicals and for bringing additional references to our attention; and, Drs. R. A. Ward, E. L. Peyton, D. Strickman and E. G. Balseiro for reviewing the manuscript.

ENTRE RIOS: Castro et al. 1959 (1960); Duret 1951a; Duret 1952. FORMOSA: Castro et al. 1959 (1960); Duret 1951a. JUJUY: Castro et al. 1959 (1960); Duret 1951a. MISIONES: Castro et al. 1959 (1960); Duret 1951a. SALTA: Castro et al. 1959 (1960); Duret 1951a. SANTA FE: Castro et al. 1959 (1960); Duret 1951a; Mitchell et al. 1985b; Mitchell et al. 1985b. TUCUMAN: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Duret 1951a.

Note: The type locality is Buenos Aires (Knight and Stone 1977).

Aedes (Howardina) aurivittatus

Distribution: SALTA: La Caldera, XI-24 and XII-10-47, 11F, Duret; Duret 1951a; same collection noted by Castro et al. 1959 (1960) and Martinez & Prosen 1953c, 1955. PROVINCE NOT SPECIFIED: Del Ponte et al. 1951.

Note: This species was not listed from Argentina by Knight & Stone (1977) and may not occur there. The record from La Caldera is probably erroneous and based on the closely related *Ae. martinezii* which has been taken from the same locality (Berlin 1969).

Aedes (Howardina) martinezii

Distribution: SALTA: La Caldera, III-27-66, 31F, Martinez; Berlin 1969, Knight & Stone, 1977.

Note: The type locality is La Caldera, Salta Province. See note under *Ae. aurivittatus*.

Aedes (Howardina) pseudodominicai

Distribution: SALTA: Campamento San Pedro, 2M, 18F, Martinez & Prosen; Martinez & Prosen 1955 (as *Ae. delponcei* Martinez & Prosen); same collection noted by Berlin 1969. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Berlin (1969) synonymized *Ae. delponcei* with this species.

Aedes (Howardina) vanemdeni

Distribution: SALTA: San Pedrito, 1F, Martinez & Prosen; Martinez & Prosen 1953c; same collection noted by Castro et al. 1959 (1960).

Note: According to Berlin (1969) and Knight & Stone (1977), this species was known only from the type series collected in Yungas de Coroico, Bolivia; therefore, the Argentine record is questionable. Subsequently, Peyton et al. (1983) collected this species in southeast Bolivia during 1982.

Aedes (Ochlerotatus) albifasciatus

Distribution: BUENOS AIRES: Castro et al. 1959 (1960); Duret 1951b; Duret 1952; Garcia & Casal 1965; Prosen et al. 1960. CATAMARCA: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). CHACO: Castro et al. 1959 (1960); Duret 1951b; Mitchell et al. 1985b. CORDOBA: Bachmann & Casal 1962d (1963) Bianchini et al. 1965 (1967), 1968; Castro et al. 1959 (1960); Duret 1951b. CORRIENTES: Castro et al. 1959 (1960); Duret 1951b; Duret 1952; Hack et al. 1978. ENTRE RIOS: Castro et al. 1959 (1960); Duret 1951b; Duret 1952. FORMOSA: Castro et al. 1959 (1960); Duret 1951b. JUJUY: Castro et al. 1959 (1960); Duret 1951b; Forattini et al. 1970. LA RIOJA: Castro et al. 1959 (1960); Duret 1951b; Forattini et al. 1970. MENDOZA: Castro et al. 1959 (1960); Duret 1951b. NEUQUEN: Bachmann & Bejarano 1960. RIO NEGRO: Bachmann & Bejarano 1960; Castro et al. 1959 (1960); Duret 1951b, Mitchell et al. 1985a. SALTA: Castro et al. 1959 (1960); Duret 1951b. SANTA CRUZ: Bachmann & Bejarano 1960. SANTA FE: Castro et al. 1959 (1960); Duret 1951b; Forattini et al. 1970; Mitchell et al. 1985a; Mitchell et al. 1985b; Ronderos & Garcia 1962a (1963a). SANTIAGO DEL ESTERO: Bachmann & Casal 1962d (1963); Castro et al. 1959 (1960); Duret 1951b. TIERRA DEL FUEGO: Bachmann & Bejarano 1960; Forattini et al. 1970. TUCUMAN: Castro et al. 1959 (1960); Duret 1951b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: This is the most widely distributed species in Argentina.

Aedes (Ochlerotatus) crinifer

Distribution: BUENOS AIRES: Arnell 1976; Balseiro 1981; Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951b; Garcia & Casal 1965; Garcia & Ronderos 1962 (1963); Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Duret 1951b. CORRIENTES: Arnell 1976; Duret 1951b; Duret 1952; Garcia & Ronderos 1962 (1963); Hack et al. 1978. ENTRE RIOS: Arnell 1976; Castro et al. 1959 (1960); Duret 1951b; Garcia & Ronderos 1962 (1963). MISIONES: Arnell 1976; Barrera Oro et al. 1966; Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951b; Duret 1952; Garcia & Ronderos 1962 (1963); Knight & Stone 1977. SALTA: Castro et al. 1959 (1960); Duret 1951b. TUCUMAN: Castro et al. 1959 (1960); Duret 1951b. PROVINCE NOT SPECIFIED: Knight 1978; Knight & Stone 1977.

Note: Three synonyms of this species have their type localities in Argentina, i.e., *Ae. lynchii* Brethes 1910, described from Islas del Parana, Buenos Aires Province; *Ae. tapinops* Brethes 1917, described from San Isidro, Buenos Aires Province; and *Ae. iguazu* Shannon & Del Ponte 1928, described from Misiones Province. Arnell (1976) stated that *Ae. crinifer* is apparently restricted to the Parana River system.

Aedes (Ochlerotatus) fluviatilis

Distribution: CORRIENTES: Bejarano 1979. MISIONES: Bejarano 1979; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951a; Zavortink 1972. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Aedes (Ochlerotatus) fulvus

Distribution: CHACO: Castro et al. 1959 (1960); Duret 1951b. FORMOSA: Castro et al. 1959 (1960); Duret 1951b. MISIONES: Castro et al. 1959 (1960); Duret 1952. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Aedes (Ochlerotatus) hastatus

Distribution: CHACO: Castro et al. 1959 (1960); Duret 1951b; Duret 1952. CORRIENTES: Castro et al. 1959 (1960); Duret 1951b; Duret 1952. MISIONES: Barrera Oro et al. 1966; Duret 1951b; Duret 1952. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Aedes (Ochlerotatus) meprai

Distribution: CATAMARCA: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Ronderos & Garcia 1962a (1963a), 1962b (1963b) *Ae. angustivittatus*. SALTA: Arnell 1976; Belkin et al. 1968; Castro et al. 1959 (1960); Knight & Stone 1977; Martinez & Prosen 1953b; Ronderos & Garcia 1962b (1963b). PROVINCE NOT SPECIFIED: Knight 1978.

Note: The type locality is Reserva Nacional "Finca El Rey", Departamento de Anta, Salta Province. This species was placed in synonymy under *Ae. angustivittatus* by Ronderos & Garcia (1962 (1963)) and resurrected as a valid species by Arnell (1976). The older records for *Ae. angustivittatus* in Argentina refer to this species.

Aedes (Ochlerotatus) milleri

Distribution: CORDOBA: Bianchini et al. 1965 (1967); Castro et al. 1959 (1960); Duret 1951b; Knight & Stone 1977. JUJUY: Castro et al. 1959 (1960); Duret 1951b; Forattini et al. 1970; Knight & Stone 1977. SALTA: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951b; Forattini et al. 1970; Knight & Stone 1977. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Aedes (Ochlerotatus) nubilus

Distribution: MISIONES: Duret 1950a, 1951a.

Note: This species has been listed as a synonym under *Ae. serratus* (Komp 1949; Del Ponte et al. 1951; Lane 1953) but Belkin et al. (1970) revalidated it based primarily on the morphology of the male genitalia. It was not reported from Argentina by Knight & Stone (1977).

Aedes (Ochlerotatus) oligopistus

Distribution: SALTA: Departamento General San Martin, Salvador Mazza (Pocitos), Departamento de Anta, Reserva Nacional "Finca El Rey"; Martinez & Prosen 1953c; same collections noted by Castro et al. 1959 (1960). PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Aedes (Ochlerotatus) patersoni

Distribution: JUJUY: Arnell 1976; Belkin et al. 1968; Castro et al. 1959 (1960); Del Ponte et al. 1951; Duret 1951b; Garcia & Ronderos 1962 (1963); Knight & Stone 1977; Ronderos & Garcia 1962a (1963a). SALTA: Arnell 1976; Casal & Garcia 1971; Garcia & Ronderos 1962 (1963).

Note: The type locality is San Pedro, Jujuy Province (Knight & Stone 1977).

Aedes (Ochlerotatus) pennai

Distribution: MISIONES: Iguazu Cue near Puerto Iguazu, XI-27 to XII-5-51, 30F, Duret; Duret 1953b; same locality given by Castro et al. 1959 (1960).

Note: According to Knight & Stone (1977) this species is restricted to Bolivia and Brazil.

Aedes (Ochlerotatus) raymondi

Distribution: JUJUY: San Pedro, IV-27-26, adults ex larvae, Shannon and Shannon; Del Ponte et al. 1951; same locality noted by Duret 1951b, Arnell 1976, and Knight & Stone 1977.

Note: The type locality is that given above under distribution.

Aedes (Ochlerotatus) scapularis

Distribution: BUENOS AIRES: Arnell 1976; Belkin et al. 1968; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b; Garcia & Casal 1965; Knight & Stone 1977. CHACO: Arnell 1976; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b; Garcia & Ronderos 1962 (1963); Mitchell et

Aedes (Ochlerotatus) synchytus

Distribution: MISIONES: Cataratas del Iguazu, XI-27-27, 42F, 1M, Shannon & Shannon; Arnell 1976; Knight 1978.

Note: The type locality is Cataratas del Iguazu, Misiones Province, Argentina (Arnell 1976).

Aedes (Protomacleaya) alboapicus

Distribution: CHACO: Saenz Pena (road to Tres Isletas), IV-6-63, 1F, Castro; Schick 1970b.

Note: This adult female is called the "Chaco form" of the *Ae. alboapicus* subgroup. Its final placement within the subgenus awaits discovery of the immature stages. This species was recorded only from Panama by Knight & Stone (1977).

Aedes (Protomacleaya) casali

Distribution: SALTA: Tablillas, General Enrique Mosconi, II-27-67, 1F, 3M, 8L; VI-6-69, 3F, Casal and Garcia; Schick 1970b, Knight & Stone 1977. TUCUMAN: Churqui, XII-4-22, 18F, 9M, 4P, 2L; Schick 1970b. PROVINCE NOT SPECIFIED: Berlin & Belkin 1980.

Note: The type locality is that given above under Salta Province.

Aedes (Protomacleaya) terrene

Distribution: CHACO: Castro et al. 1959 (1960); Duret 1951a. JUJUY: Castro et al. 1959 (1960); Duret 1951a. MISIONES: Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951a; Duret 1952; Martinez & Prosen 1951; Schick 1970a. PROVINCE NOT SPECIFIED: Berlin & Belkin 1980; Knight & Stone 1977.

Note: Schick (1970b) pointed out that the *terrene* group is poorly known, especially in northern Argentina. He has several small collections from there which apparently represent undescribed species.

Aedes (Stegomyia) aegypti

Distribution: BUENOS AIRES: Carcavallo & Martinez 1968a; Del Ponte 1958; Duret 1951a. CATAMARCA: Carcavallo & Martinez 1968a; Del Ponte 1958. CHACO: Carcavallo & Martinez 1968a; Del Ponte 1958; Duret 1951a. CORDOBA: Bianchini et al. 1965 (1967); Carcavallo & Martinez 1968a; Del Ponte 1958; Duret 1951a. TUCUMAN: Carcavallo & Martinez 1968a; Del Ponte 1958; Duret 1951a. PROVINCE NOT SPECIFIED: Castro et al. 1959 (1960).

Note: The above citations refer to the known distribution of this species prior to initiation of the eradication campaign in 1955 (Carcavallo & Martinez 1968a). Presently, *Ae. aegypti* is not known to occur in Argentina.

Anopheles (Anopheles) annulipalpis

Distribution: BUENOS AIRES: Bejarano 1957; Bejarano 1959 (1960); Belkin et al. 1968; Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Garcia & Casal 1964 (1965); Garcia & Casal 1965; Garcia & Ronderos 1962; Knight & Stone 1977; Prosen et al. 1960. CORRIENTES: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Del Ponte 1958; Duret 1950c; Garcia & Ronderos 1962. ENTRE RIOS: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Duret 1952; Garcia & Ronderos 1962. MENDOZA: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Del Ponte 1958; Duret 1950c; Forattini et al. 1970; Garcia & Ronderos 1962. SANTA FE: Carcavallo & Martinez 1968b.

Note: The type locality is Baradero, Buenos Aires (Belkin et al. 1968; Knight & Stone 1977).

Anopheles (Anopheles) apicimacula

Distribution: BUENOS AIRES: Carcavallo & Martinez 1968b. MISIONES: Carcavallo & Martinez 1968b. SALTA: Carcavallo & Martinez 1968b. SANTA FE: Garcia & Ronderos 1962.

Note: This species was not recorded from Argentina by Knight & Stone (1977).

Anopheles (Anopheles) evandroi

Distribution: CHACO: Martinez et al. 1959. FORMOSA: Martinez et al. 1959. SALTA: Carcavallo & Martinez 1968b; Garcia & Ronderos 1962; Martinez et al. 1959. SANTA FE: Carcavallo & Martinez 1968b; Garcia & Ronderos 1962; Martinez et al. 1959. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Garcia & Ronderos (1962) and Carcavallo & Martinez (1968b) apparently misquoted Martinez et al. (1959) by listing Misiones, Salta and Santa Fe as the Provinces in which this species occurs, when actually the latter authors recorded Formosa, Chaco, Santa Fe and Salta Provinces.

Anopheles (Anopheles) fluminensis

Distribution: CORRIENTES: Carcavallo & Martinez 1968b; Garcia & Ronderos 1962. JUJUY: Carcavallo & Martinez 1968b; Garcia & Ronderos 1962. MISIONES: Bejarano 1957; Bejarano 1959 (1960); Belkin et al. 1968; Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Duret 1952; Garcia & Ronderos 1962; Knight & Stone 1977. SALTA: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Garcia & Ronderos 1962.

Anopheles (Anopheles) intermedius

Distribution: ENTRE RIOS: Carcavallo & Martinez 1968b; Garcia & Ronderos 1962.

Note: Garcia & Ronderos (1962) and Carcavallo & Martinez (1968b) do not indicate where and when the collections were made in Entre Rios Province. Knight & Stone (1977) recorded *An. intermedius* as far south as Brazil but not in Argentina. Peyton et al. (1983) recorded it from Bolivia.

Anopheles (Anopheles) maculipes

Distribution: BUENOS AIRES: Bejarano 1957; Bejarano 1959 (1960); Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Garcia & Ronderos 1962; Prosen et al. 1960. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Two synonyms of this species have their type localities in Argentina: *An. argentinus* Brethes 1912 - described from a series collected in Tucuman, Salta, Jujuy and Santiago del Estero Provinces; *An. tucumanus* Lahille 1912 - from Rio Sali, Tucuman Province. A valid subspecies, *pateroni* Alvarado & Heredia 1947, was originally collected in Tucuman Province. Its holotype is the egg stage, perceived to be different from the egg of the type subspecies.

Anopheles (Anopheles) punctimacula

Distribution: BUENOS AIRES: Bejarano 1957; Bejarano 1959 (1960); Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Garcia & Ronderos 1962; Prosen et al. 1960. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: The type locality of this species is Tucuman and the type locality for one of its synonyms, *An. clarki* Komp 1943, is Monteros, Tucuman (Knight & Stone 1977; Faran 1981). *Anopheles noroestensis* Galvao & Lane 1937 is considered to be a synonym of *An. evansae* by Faran (loc. cit.) so that all previous literature alluding to it is referable to *evansae*. Peyton et al. (1983) called attention to the correct gender for the name of this species. Various authors have incorrectly referred to it as *evansi*, e.g., Faran (1981).

Anopheles (Nyssorhynchus) lutzii

Distribution: MISIONES: Bejarano 1953; Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Duret 1952; Garcia & Ronderos 1962; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Anopheles (Nyssorhynchus) nigritarsis

Distribution: MISIONES: Eldorado, X-1-48, 1F, Bejarano and Duret; Bejarano & Duret 1949b; same collection noted by Bejarano 1953, 1957, 1959 (1960); Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Garcia & Ronderos 1962. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Duret (1950c) suggested that the specimen of *An. nigritarsis* could be an anomalous *An. lutzii* with atypical markings on the hindtarsi.

Anopheles (Nyssorhynchus) oswaldoi

Distribution: FORMOSA: Bejarano 1957; Carcavallo & Martinez 1968b; Del Ponte 1958; Faran 1980; Faran & Linthicum 1981; Garcia & Ronderos 1962. MISIONES: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Faran 1980; Faran & Linthicum 1981; Garcia & Ronderos 1962. Anopheles (Nyssorhynchus) parvus

Distribution: MISIONES: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c.
PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Anopheles (Nyssorhynchus) pictipennis

Distribution: FORMOSA: Garcia & Ronderos 1962. SALTA: Bejarano 1959 (1960). PROVINCE NOT SPECIFIED: Faran & Linthicum 1981; Knight & Stone 1977.

Note: Apparently, all records for this species from Argentina are based on the single collection made by Martini (1931a). Martini indicated only that his collection came from "northern Argentina". Other authors, noted above, interpreted this as Formosa or Salta Provinces. Duret (1950c) doubted that the species occurs in Argentina.

Anopheles (Nyssorhynchus) rondoni

Distribution: CHACO: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Duret 1950c; Faran 1980; Faran & Linthicum 1981; Garcia & Ronderos 1962. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: There have been 4 subspecies described under this species, *bachmanni* Petrocchi, *chagasi* Galvao, *davisi* Paterson and Shannon and *perezi* Shannon and Del Ponte. All have been synonymized with the type species which was discussed by Faran (1980). The type localities for 3 of them are in Argentina as follows: *bachmanni* - described from a series collected in Corrientes, Entre Rios and Formosa Provinces; *davisi* - Tres Pozos, Embarcacion, Salta Province; *perezi* - Santa Barbara, Tucuman Province.

Chagasia fajardi

Distribution: CHACO: Bejarano 1957; Bejarano 1959 (1960); Carcavallo & Martinez 1968b; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1950c; Garcia & Ronderos 1962. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Coquillettidia (Rhynchotaenia) albicosta

Distribution: FORMOSA: Puerto Pilcomayo; Carcavallo & Martinez 1968a.

Note: Not listed from Argentina by Knight & Stone (1977).

Coquillettidia (Rhynchotaenia) albifera

Distribution: BUENOS AIRES: Parana de Las Palmas, XII-63 to III-64, many F, M, Garcia and Casal; Garcia & Casal 1965; Castro & Bressanello 1952b.

Note: Castro & Bressanello (1952b) were unable to determine whether specimens collected in Argentina were *Cq. albifera* or *Cq. chrysonotum*. Indeed, Lane (1953) stated, "There are no precise characters to separate the females [of *albifera*] from *chrysonotum*." Knight & Stone (1977) reported this species only from Brazil.

Coquillettidia (Rhynchotaenia) chrysonotum

Distribution: BUENOS AIRES: Carcavallo & Martinez 1968a; Castro & Bressanello 1952b; Castro et al. 1959 (1960); Prosen et al. 1960. CHACO: Mitchell et al. 1985b. CORRIENTES: Mitchell et al. 1985b. ENTRE RIOS: Carcavallo & Martinez 1968a; Castro & Bressanello 1952b; Castro et al. 1959 (1960). PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: See note under *Cq. albifera*.

Coquillettidia (Rhynchotaenia) fasciolata

Distribution: BUENOS AIRES: Belkin et al. 1968; Castro & Bressanello 1952b; Castro et al. 1959 (1960); Duret 1951a; Garcia & Casal 1965; Knight & Stone 1977; Prosen et al. 1960. CHACO: Duret 1951a. FORMOSA: Duret 1951a. JUJUY: Duret 1951a. SANTA FE: Duret 1951a. TUCUMAN: Duret 1951a.

Note: The type locality for this species is Navarro, Buenos Aires Province. Since the holotype was lost, Castro & Bressanello (1952b) designated as neotype an adult female collected in Parque Lezama, Buenos Aires Province, XII-13-28.

Coquillettidia (Rhynchotaenia) hermanoi

Distribution: CHACO: Castro & Bressanello 1952b; Castro et al. 1959 (1960); Duret 1951a. CORRIENTES: Castro & Bressanello 1952b; Castro et al. 1959 (1960); Duret 1951a; Duret 1952; Hack et al. 1978. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Coquillettidia (Rhynchotaenia) neivai

Distribution: CHACO: Las Palmas, Zona Ingenio, XI-20-49, Bejarano & Duret; Castro & Bressanello 1952b; Duret 1950a, 1951a. SANTA FE: Reconquista, XI-41; Villa Guillermina, I-42, Del Ponte; Castro & Bressanello 1952b; Duret 1950a, 1951a.

Note: This species was placed in synonymy under *Cq. nigricans* by Lane (1951) and resurrected as a valid species by Belkin et al. (1970). Undoubtedly, some of the records for *nigricans* cited by Castro et al. (1959 (1960)) are referable to this species. Knight & Stone (1977) listed this species only from Brazil.

Coquillettidia (Rhynchotaenia) nigricans

Distribution: CHACO: Castro & Bressanello 1952b; Castro et al. 1959 (1960); Duret 1951a. CORRIENTES: Castro & Bressanello 1952b; Castro et al. 1959 (1960); Duret 1951a. FORMOSA: Duret 1951a. MISIONES: Castro et al. 1959 (1960); Duret 1952. SALTA: Duret 1951a. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Knight & Stone (1977) questioned the occurrence of this species in Argentina or indeed in southern South America at all. Belkin et al. (1970) pointed out the ease with which the females of *Cq. nigricans* can be confused with those of *Cq. venezuelensis* and suggested that *nigricans* is confined to northern South America while *venezuelensis* is the widespread species on the continent.

Coquillettidia (Rhynchotaenia) shannoni

Distribution: CHACO: Castro & Bressanello 1952b. CORRIENTES: Castro & Bressanello 1952b; Castro et al. 1959 (1960). ENTRE RIOS: Castro & Bressanello 1952b; Castro et al. 1959 (1960). PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: A synonym, *Cq. araozi* Shannon & Del Ponte 1928, was described from specimens collected in Ledesma, Jujuy, III-20-26 by Davis and Shannon (Dyar 1928; Castro & Bressanello 1952b; Belkin et al. 1968; Knight & Stone 1977).

Culex (Aedinus) amazonensis

Distribution: CHACO: Resistencia, IV-5-80, 1F, Mitchell; Mitchell et al. 1985b. CORRIENTES: Colonia Pellegrini, III-51, 1M(?), Duret; Duret 1953b, same collection cited by Castro et al. 1959 (1960); Rincon de Vences about 5 km SE of San Luis del Palmar, IV-5-80, 8F, Mitchell ; 2 km SE of Estero de las Maloyas, IV-6-80, 3F, Mitchell; Mitchell et al. 1985b.

Note: This species was not reported from Argentina by Knight & Stone (1977).

Culex (Allimanta) tramacayguesi

Distribution: CORDOBA: Banos de Unquillo, Dept. Cruz del Eje, IX-7-63 L, P, Cichero; Bianchini et al. 1965 (1967); LA RIOJA: Vinchina, XI-25-53, 1M, Duret; Duret 1954a. Note: The type locality of this species is Monte Caman, Mendoza (Duret 1954a). The species was originally placed in the subgenus *Culex* but Casal & Garcia (1968b) erected a new subgenus, *Allimanta*, for it.

Culex (Anoedioporpa) chaguancio

Distribution: MISIONES: San Pedro, Rte. 14, Km 327, II-13-66, 11pF, 2L, Casal & Garcia; Berlin 1980. SALTA: Tablillas, Dept. of San Martin, II-25-68, 4M, 41L, Casal & Garcia; Casal, Garcia & Fernandez 1968; Knight & Stone 1977; Berlin & Belkin 1980.

Note: The type locality for this species is Tablillas, Dept. of San Martin, Salta.

Culex (Carrollia) soperi

Distribution: MISIONES: San Pedro, III-9-66, 1P, 2L, Casal & Garcia; Casal & Garcia 1967 (1968); Valencia 1973. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Culex) acharistus

Distribution: CORDOBA: Bachmann & Casal 1962e (1963); Bianchini et al. 1965 (1967); Bram 1967. JUJUY: Bachmann & Casal 1962e (1963); Bram 1967. NEUQUEN: Bachmann & Casal 1962e (1963) Bianchini et al. 1965 (1967); Bram 1967. RIO NEGRO: Bachmann & Casal 1962e (1963); Bram 1967. TUCUMAN: Bram 1967. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Culex) ameliae

Distribution: MISIONES: San Pedro-El Dorado road, 10 Km W of San Pedro, III-11-66, 1M, Garcia & Casal; Casal 1967; Belkin et al. 1968; Knight & Stone 1977.

Note: The type locality, in Misiones Province, is given above.

Culex (Culex) apicinus

Distribution: CATAMARCA: Castro et al. 1959 (1960); Duret 1953b. CORDOBA: Bianchini 1965 (1967); Cordoba, X-84, 4M, Buffa. JUJUY: Castro et al. 1959 (1960); Duret 1953b; LA RIOJA: Castro et al. 1959 (1960); Duret 1953b; Martinez et al. 1961b. SANTA FE: La Celina, II-28-84, 3F, Mitchell; Mitchell et al. 1985a.

Note: According to Knight & Stone (1977), *Cx. apicinus* occurs only in Chile, Peru and Bolivia but actually it is locally common in parts of Argentina. It has been listed by its synonym, *Cx. debilis* Dyar & Knab by Martinez et al. (1961b) and Bianchini et al. 1965 (1967).

Culex (Culex) articulalis

Distribution: NEUQUEN: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. RIO NEGRO: Bram 1967; Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Culex) bidens

Distribution: BUENOS AIRES: Bachmann & Casal 1962a. CHACO: Bachmann & Casal 1962a; Castro et al. 1959 (1960); Duret 1953b. CORDOBA: Bianchini et al. 1965 (1967); CORRIENTES: Bachmann & Casal 1962a; Castro et al 1959 (1960); Duret 1953b. ENTRE RIOS: Castro et al. 1959 (1960); Duret 1953b. FORMOSA: Bachmann & Casal 1962a; Duret 1953b. JUJUY: Duret 1951a. LA RIOJA: Bachmann & Casal 1962a. MISIONES: Castro & Garcia 1959 (1960); Castro et al 1959 (1960). SALTA: Bachmann & Casal 1962a; Castro et al. 1959 (1960); Duret 1953b. SANTA FE: Mitchell et al. 1985a. TUCUMAN: Bachmann & Casal 1962a; Castro et al. 1959 (1960); Duret 1951a. PROVINCE NOT SPECIFIED: Bram 1967; Knight & Stone 1977.

Note: Bachmann & Casal (1962a) and Castro et al. 1959 (1960) used the name *Cx. virgultus* Theobald for *bidens*. They followed Lane (1953) who synonymized *bidens* under *virgultus*. However, Bram (1967) not only resurrected *bidens*, based on the male genitalia being distinct from *virgultus*, but also synonymized *Cx. interfor* Dyar with *bidens*. The holotype male of *interfor* was collected on a train between Tucuman and Jujuy, (Belkin et al. 1968; Knight & Stone 1977). Stone (1956 (1957)) synonymized *Cx. virgultus* under *Cx. declarator* Dyar & Knab.

Culex (Culex) brethesi

Distribution: BUENOS AIRES: Bachmann & Casal 1962a; Belkin et al. 1968; Bram 1967; Castro et al. 1959 (1960); Duret 1951a; Duret 1953b; Knight & Stone 1977. Distribution: BUENOS AIRES: Canal 6 and Parana de las Palmas, Estacion Agropecuaria Delta del I.N.T.A., 30F, 37M, 1P, 163L, 26 1pAd, Garcia & Casal; Casal & Garcia 1967a; Belkin et al. 1968; Knight & Stone 1977; Los Talas (Partido de Berisso), II-25 to VI-29-82, various specimens, Balseiro; Balseiro 1983.

Note: The type locality is the first location listed above under distribution.

Culex (Culex) chidesteri

Distribution: BUENOS AIRES: Garcia & Casal 1965. CORDOBA: Bianchini et al. 1965 (1967). SALTA: Casal & Garcia 1971. TUCUMAN: Bram 1967. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Culex) coronator

Distribution: BUENOS AIRES: Duret 1951a. CATAMARCA: Castro et al. 1959 (1960); Duret 1951a Duret 1953b. CORRIENTES: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. FORMOSA: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). JUJUY: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. MISIONES: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b SALTA: Castro et al. 1959 (1960); Duret 1953b. TUCUMAN: Castro et al. 1959 (1960); Duret 1951a. PROVINCE NOT SPECIFIED: Bram 1967; Knight & Stone 1977.

Note: *Culex coronator* is part of a species complex which includes: *Cx. coronator*, *Cx. usquatus*, *Cx. usquatissimus* Dyar, *Cx. ousqua* Dyar and *Cx. camposi* Dyar. The first two species occur in Argentina. (Bram 1967).

Culex (Culex) cuyanus

Distribution: LA RIOJA: Villa Union, XI-23-53, 1M, Bejarano & Duret; Duret 1968; MENDOZA: Uspallata, XII-5-53, 1M, Bejarano & Duret; Duret 1968. SAN JUAN: Jachal, XI-24 to 27-53, 7M, Bejarano & Duret; Duret 1968; Knight & Stone, 1977.

Note: The type locality is Jachal, San Juan (Duret 1968; Knight & Stone 1977).

Culex (Culex) dolosus

Distribution: BUENOS AIRES: Belkin et al. 1968; Casal & Garcia 1968a; Castro et al. 1959 (1960); Duret 1951a; Duret 1953b; Knight & Stone 1977; Prosen et al. 1960. CORDOBA: Bianchini et al. 1965 (1967). CORRIENTES: Castro et al. 1959 (1960); Duret 1953b. MISIONES: Castro et al. 1959 (1960); Duret 1953b. NEUQUEN: Bachmann & Bejarano 1960. TUCUMAN: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. PROVINCE NOT SPECIFIED: Bram 1967.

Note: The original description was based on specimens from Las Conchas, Zarate, Baradero, Navarro and Chacabuco, Buenos Aires Province (Belkin et al. 1968; Knight & Stone 1977).

Culex (Culex) eduardoi

Distribution: BUENOS AIRES: Canal 6 and Parana de las Palmas, Estacion Agropecuaria Delta del I.N.T.A., 45F, 37M, 126L, 82 1pAd, Garcia & Casal; Casal & Garcia 1968; Belkin et al 1968; Knight & Stone 1977; Berisso, IX-24-79 to V-5-80, various specimens, Balseiro; Balseiro 1981.

Note: The type locality is the first location listed above under distribution.

Distribution: SALTA: Quebrada de Piquirenda, XI-26-65, 46F, 38M, 38P, 148L, 23 1pAd, Fernandez, Hepper, Garcia & Casal; Casal et al. 1966; Belkin et al. 1968; Knight & Stone 1977.

Note: The type locality is given above.

Culex (Culex) hepperi

Distribution: BUENOS AIRES: Canal 6 and Parana de las Palmas, Estacion Agropecuaria Delta del I.N.T.A., IV-30-66, 65F, 59M, 15P, 130L, 62 1pAd, 55 pAd, Garcia & Casal; Casal & Garcia 1967c; Belkin et al. 1968; Knight & Stone 1977.

Note: The type locality is given above.

Culex (Culex) inflictus

Distribution: BUENOS AIRES: San Isidro, 2M; Prosen et al. 1960.

Note: Garcia & Casal (1965) reported that the identification of *Cx. inflictus* was in error. Its presence in Argentina is doubtful since its known distribution, as stated by Bram (1967) and Knight & Stone (1977) extends no farther south than Venezuela and Colombia.

Culex (Culex) lahillei

Distribution: CORDOBA: Achiras, III-38, 2M, 1F, 5P, Del Ponte; Bachmann & Casal 1962b; Belkin et al. 1968; Bianchini et al. 1965 (1967); Bram 1967; Knight & Stone 1977.

Note: The type locality is given above.

Culex (Culex) maxi

Distribution: BUENOS AIRES: Garcia & Casal 1965. CHACO: Castro et al. 1959 (1960); Duret 1953b. CORDOBA: Bachmann & Casal 1962e (1963); Bianchini et al. 1965 (1967). Distribution: CHACO: Resistencia, Rio Negro Bridge, IV-9-80, 7M, Mitchell; Rio Tragadero near Antequera, IV-8-80, 1M, Mitchell; Sirivanakarn & Jakob 1981; Mitchell et al. 1985b. CORRIENTES: 5 Km SE of San Luis del Palmar on Rte. 5, 1F, Mitchell, Mitchell et al. 1985b.

Note: Before 1970, *Cx. ocoossa* was considered a synonym of *Cx. aikenii* (Aiken & Rowland) (Stone et al. 1959), but Belkin (1970) revalidated it along with *Cx. panocossa* Dyar, a species not found in Argentina, and the name *aikenii* was relegated to nomen dubium. *Culex ocoossa* was not listed from Argentina by Knight & Stone (1977).

Culex (Melanoconion) oedipus

Distribution: BUENOS AIRES: Canal 6 and Parana de las Palmas, VI-5-63, 1pM, Garcia & Casal; Garcia & Casal 1964 (1965); 1965. CHACO: Ciervo Petizo, XII-2-49, 1M, Duret; Castro et al. 1959 (1960); Duret 1953a,b; 1954b. SANTA FE: San Justo, V-8-78, 1M, Mitchell; Sirivanakarn & Jakob 1981. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Melanoconion) orfilai

Distribution: MISIONES: Iguazu, Villa Tacuara, XI-21-51, 5M, Duret; Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1953a,b; 1954b; Knight & Stone 1977.

Note: The type locality is given above.

Culex (Melanoconion) pavlovskyi

Distribution: CORRIENTES: Aeropuerto de Camba Punta, III-4-66, 1M, Casal; Belkin et al. 1968; Casal & Garcia 1967b; Knight & Stone 1977. MISIONES: Casal & Garcia 1967b.

Note: The type locality is given above under Corrientes Province.

Culex (Melanoconion) pedroi

Distribution: CHACO: Rio Negro Bridge, W. of Resistencia, IV-10-80, 1M, Mitchell; Sirivanakarn & Jakob 1981. CORRIENTES: Locality and collection data not given; Sirivanakarn & Belkin 1980.

Note: This species was previously lumped with *Cx. taeniopus* from which it was separated by Sirivanakarn & Belkin (1980). The collection of Mitchell reported by Sirivanakarn & Jakob (1981) appears to be the first definite record for Argentina.

Culex (Melanoconion) pilosus

Distribution: CHACO: Castro et al. 1959 (1960); Duret 1953a; Duret 1953b; Duret 1954b; Sirivanakarn & Jakob 1981. CORDOBA: Bianchini et al. 1965 (1967). CORRIENTES: Castro et al. 1959 (1960); Duret 1953a; Duret 1953b; Duret 1954b; Sirivanakarn & Jakob 1981. MISIONES: Castro et al. 1959 (1960); Duret 1953a; Duret 1953b; Duret 1954b. SANTA FE: Duret 1953a; Duret 1953b; Duret 1954b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Melanoconion) plectoporpe

Distribution: CHACO: Rio Negro Bridge W. of Resistencia, IV-10-80, 3M, Mitchell; Sirivanakarn & Jakob 1981.

Note: Not reported from Argentina by Knight & Stone (1977).

Culex (Melanoconion) rooti

Distribution: MISIONES: San Pedro, III-15-51, 1M, Duret; Castro et al. 1959 (1960); Duret 1953a,b; 1954b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Melanoconion) serratimarge

Distribution: MISIONES: Cerro Azul, Arroyo San Juan, V-2-49, 1M, Duret; Castro et al. 1959 (1960); Duret 1953a,b; 1954b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Melanoconion) taeniopus

Distribution: CORRIENTES: Ramada Paso, IX-16-48, 2M, Duret; Duret 1953a,b; 1954b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Melanoconion) theobaldi

Distribution: CORRIENTES: Paso de los Libres, IV-15-51, 1M, Bejarano; Duret 1953a,b; 1954b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Culex (Microculex) davisi

Distribution: CORRIENTES: El Perichon, III-28-69, various specimens; Torales et al. 1972.

Note: Not reported from Argentina by Knight & Stone (1977).

Culex (Microculex) imitator

Distribution: CHACO: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. CORRIENTES: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b; Torales et al. 1972. FORMOSA: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. MISIONES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). SANTA FE: Castro et al. 1959 (1960); Duret 1953b. TUCUMAN: Castro et al. 1959 (1960); Duret 1951a; Duret 1953b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Haemagogus (Conopostegus) leucocelaeetus

Distribution: CHACO: Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951a. CORRIENTES: Bejarano 1979; Carcavallo & Martinez 1968a. FORMOSA: Castro et al. 1959 (1960); Del Ponte 1958; Manso Soto et al. 1953. JUJUY: Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951a; Manso Soto et al. 1953. MISIONES: Barrera Oro et al. 1966; Bejarano 1979; Castro et al. 1959 (1960); Duret 1951a; Duret 1952; Manso Soto et al. 1953; Zavortink 1972. SALTA: Alvarado et al. 1959 (1960); Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951a; Forattini et al. 1970; Manso Soto et al. 1953; Martinez & Prosen 1953c; Zavortink 1972. TUCUMAN: Castro et al. 1959 (1960); Duret 1951a; Duret 1952; Manso Soto et al. 1953; Zavortink 1972. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Castro (1959 (1960), p. 175) first pointed out that this species should be placed in the genus *Haemagogus*, not *Aedes*, but erroneously synonymized it under *leucomelas* Lutz, a name that was preoccupied, and the taxon had been renamed *leucocelaeetus* by Dyar & Shannon (1924). The species continued to be included in *Aedes* (e.g., Carcavallo & Martinez 1968) until 1972 when Zavortink transferred it to *Haemagogus*, subgenus *Conopostegus*.

Haemagogus (Haemagogus) capricornii

Distribution: CORRIENTES: Carcavallo & Martinez 1968a; MISIONES: Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b; Martinez et al. 1961a. SALTA: Castro et al. 1959 (1960).

Note: Neither Arnell (1973) nor Knight & Stone (1977) recorded this species from Argentina, although Arnell's map in Fig. 3 shows it in Misiones Province, and he includes references to the published work of Martinez et al. 1961a and Martinez & Carcavallo (1965) in his synonymy review. Dyar's (1928) report of *Hg. equinus* Theobald in Argentina probably refers to this species since he listed *capricornii* as a synonym of *equinus*.

Haemagogus (Haemagogus) janthinomys

Distribution: CATAMARCA: Arnell 1973; Carcavallo & Martinez 1968a (as *Hg. capricornii petrocchiae*). JUJUY: Arnell 1973; Carcavallo & Martinez 1968a. SALTA: Arnell 1973; Belkin et al. 1968; Carcavallo & Martinez 1968a; Martinez et al. 1961a; Knight & Stone 1977. TUCUMAN: Carcavallo & Martinez 1968a.

Note: Martinez et al. (1961a) named three taxa in Argentina as distinct, *Hg. capricornii janthinomys* Dyar, *Hg. capricornii falco* Kumm, Osorno-Mesa & Boshell-Manrique and *Hg. capricornii petrocchiae* Martinez, Carcavallo & Prosen. Arnell (1973) made significant changes by removing *janthinomys* as a subspecies of *capricornii* and raising it to specific rank. The other two taxa were synonymized under *janthinomys*. Another synonym of this species is *Hg. spegazzini falco* Kumm, Osorno-Mesa & Boshell-Manrique, the name used previously for a widely distributed taxon and a principal vector of sylvatic yellow fever (Arnell 1973). The record for *janthinomys* from Tucuman by Carcavallo & Martinez (1968a) (as *Hg. c. petrocchiae*) is indicated only by a map, Fig. 63.

Haemagogus (Haemagogus) spegazzinii

Distribution: CATAMARCA: Castro et al. 1959 (1960); Del Ponte 1958. CHACO: Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b; Manso Soto et al. 1953. CORDOBA: Arnell 1973; Bianchini et al. 1965 (1967); Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b. CORRIENTES: Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b; Duret 1952; Hack et al. 1978. FORMOSA: Arnell 1973; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b; Manso Soto et al. 1953. JUJUY: Arnell 1973; Belkin et al. 1968; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951b; Forattini et al. 1970; Knight & Stone 1977; Manso Soto et al. 1953. SALTA: Alvarado et al. 1959 (1960); Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951b; Forattini et al. 1970; Manso Soto et al. 1953; Martinez & Prosen 1953c. SAN LUIS: Bejarano et al. 1954; Castro et al. 1959 (1960); Del Ponte 1958. SANTA FE: Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951b. SANTIAGO DEL ESTERO: Arnell 1973; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951b. TUCUMAN: Arnell 1973; Belkin et al. 1968; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Del Ponte 1958; Duret 1951b; Knight & Stone 1977; Manso Soto et al. 1953.

Note: The type locality for this species is in Jujuy Province, locality not specified (Knight & Stone, 1977). Before the monograph of Arnell (1973), this species and its subspecies, *falco* (now a synonym of *janthinomys*) were thought to be extensively distributed in Central and South America. Under the present concept, *spegazzini* (s. str.) is confined to eastern and southern Brazil, eastern Bolivia, Paraguay and northern Argentina. This species extends farther south in Argentina than any other *Haemagogus*. A synonym of

spiegazzini, *Hg. uriarlei* Shannon & Del Ponte, was the name used by Duret (1950c, 1951b, 1952) and Castro et al. 1959 (1960) for this species. It was synonymized under *spiegazzini* by Martinez et al. (1961a).

Limatus durhamii

Distribution: CHACO: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). FORMOSA: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). JUJUY: Castro et al. 1959 (1960); Duret 1951c. MISIONES: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951c; Duret 1952; Knight & Stone 1977; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Mansonia (Mansonia) flaveola

Distribution: BUENOS AIRES: Islas del Parana, 1F; Prosen et al. 1960. CHACO: Las Palmas, XI-16-49; Puerto Las Palmas, XII-50; Costa Ine, XII-50; Castro et al. 1959 (1960); Duret 1951a, 1952; Mitchell et al. 1985c. CORRIENTES: Mitchell et al. 1985b. SANTA FE: Villa Guillermina, XII-30-41; Castro et al. 1959 (1960); Duret 1951a. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Belkin et al. (1970) stated that *flaveola* (*sensu stricto*) is probably restricted to the Caribbean Basin and that the South American populations, although belonging to the *flaveola* complex, appear to be distinct; however, additional material is needed to decide the matter.

Mansonia (Mansonia) humeralis

Distribution: BUENOS AIRES: Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Duret 1951a; Duret 1952. CORRIENTES: Castro et al. 1959 (1960); Duret 1952; Hack et al. 1978. ENTRE RIOS: Castro et al. 1959 (1960); Duret 1951a; Duret 1952. FORMOSA: Duret 1951a. SALTA: Castro et al. 1959 (1960); Duret 1951a. SANTA FE: Castro et al. 1959 (1960); Duret 1951a. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Mansonia (Mansonia) indubitans

Distribution: BUENOS AIRES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Garcia & Casal 1965; Prosen et al. 1960; Ronderos & Bachmann 1963. CHACO: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Ronderos & Bachmann 1963. CORDOBA: Bianchini et al. 1965 (1967). CORRIENTES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Duret 1953b; Ronderos & Bachmann 1963. ENTRE RIOS: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Ronderos & Bachmann 1963. FORMOSA: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Ronderos & Bachmann 1963. MISIONES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Ronderos & Bachmann 1963. SALTA: Ronderos & Bachmann 1963. SANTA FE: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Ronderos & Bachmann 1963.

Note: Belkin et al. (1970) determined that the "indubitans" of the Caribbean area are different from those in South America; therefore, a new species was described, *Ma. dyari* Belkin, Heinemann & Page. Knight & Stone (1977) do not list *Ma. indubitans* from Argentina.

Ronderos & Bachmann (1963) believed that all records of *Ma. pessaoi* for Argentina are referable to *indubitans*. These records include: BUENOS AIRES: Baradero, X-26-47; Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). CHACO: General Obligado, IV-50; Duret 1951a. ENTRO RIOS: Ibicucyrito, III-2-38; Castillo leg., Brazo Largo, II-2-40, I-15-49, II-20-49, XII-51; Mazaruca, I-41; Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). SANTA FE: Santa Fe, II-10-41; Bacigalugo leg., Villa Guillermina, I-5-52; Castro & Garcia 1959 (1960); Castro et al. 1959 (1960). Knight & Stone (1977) recorded *Ma. pessaoi* only from Brazil.

Mansonia (Mansonia) pseudotitillans

Distribution: BUENOS AIRES: Garcia & Casal 1965; Ronderos & Bachmann 1963. CHACO: Ronderos & Bachmann 1963. CORRIENTES: Ronderos & Bachmann 1963. ENTRE RIOS: Ronderos & Bachmann 1963. FORMOSA: Ronderos & Bachmann 1963. MISIONES: Ronderos & Bachmann 1963. SALTA: Ronderos & Bachmann 1963. SANTA FE: Ronderos & Bachmann 1963.

Note: Not listed from Argentina by Knight & Stone (1977).

Mansonia (Mansonia) titillans

Distribution: BUENOS AIRES: Carcavallo & Martinez 1968a; Duret 1951a; Garcia & Casal 1965; Prosen et al. 1960; Ronderos & Bachmann 1963. CHACO: Carcavallo & Martinez 1968a; Duret 1951a; Ronderos & Bachmann 1963. CORDOBA: Carcavallo & Martinez 1968a; Duret 1951a; Ronderos & Bachmann 1963. CORRIENTES: Carcavallo & Martinez 1968a; Duret 1951a; Duret 1952; Hack et al. 1978; Ronderos & Bachmann 1963. ENTRE RIOS: Carcavallo & Martinez 1968a; Duret 1951a; Ronderos & Bachmann 1963. FORMOSA: Carcavallo & Martinez 1968a; Duret 1951a; Ronderos & Bachmann 1963. JUJUY: Carcavallo & Martinez 1968a; Duret 1951a. MISIONES: Carcavallo & Martinez 1968a; Duret 1951a; Ronderos & Bachmann 1963. SALTA: Carcavallo & Martinez 1968a; Duret 1951a; Ronderos & Bachmann 1963. SANTA FE: Carcavallo & Martinez 1968a; Duret 1951a; Mitchell et al. 1985b; Mitchell et al. 1985c; Ronderos & Bachmann 1963. SANTIAGO DEL ESTERO: Carcavallo & Martinez 1968a; Ronderos & Bachmann 1963. TUCUMAN: Carcavallo & Martinez 1968a; Duret 1951a. PROVINCE NOT SPECIFIED: Belkin et al. 1970.

Note: Belkin et al. (1970) suggested that *Ma. titillans* populations in the northern and southern parts of its range may be different.

Orthopodomyia sampaioi

Distribution: MISIONES: Paranai, XI-29-45, L, Del Ponte; Castro & Bressanello 1952a; Castro et al. 1959 (1960); Duret 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: In his monograph on the *Orthopodomyia*, Zavortink (1968) described the adult female and male but indicated that the immature stages are poorly known. He did not mention Argentina in his distribution data.

Phoniomyia diabolica

Distribution: MISIONES: Arroyo Nandu, 15 km SE of Puerto Iguazu, 2M; Garcia & Casal 1968b.

Note: Knight & Stone (1977) recorded this species only from Brazil.

Phoniomyia flabellata

Distribution: MISIONES: Iguazu, III-3-53, 2F; Castro & Garcia 1959 (1960); Castro et al. 1959 (1960).

Note: See note under *Ph. diabolica*.

Phoniomyia muehleni

Distribution: CHACO: Belkin et al. 1968; Casal & Garcia 1970; Castro et al. 1959 (1960); Correa & Ramalho 1956; Duret 1951c; Knight & Stone 1977. CORRIENTES: Castro et al 1959 (1960); Duret 1951c; Hack et al. 1978; Torales et al. 1972. FORMOSA: Casal & Garcia 1970; Castro et al. 1959 (1960); Duret 1951c; Forattini et al. 1970. MISIONES: Castro et al 1959 (1960); Duret 1951c. SANTA FE: Castro et al. 1959 (1960); Duret 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: The type locality was either Saenz Pena, Resistencia or Charadai, Chaco Province. Since the holotype is missing, a lectotype, collected also by Petrocchi in Formosa Province, was designated by Casal & Castro (1970).

Phoniomyia pilicauda

Distribution: MISIONES: Arroyo Yacui, X-47; Cataratas del Iguazu, X-47, X-48; Puerto Piray, IX-48; Deseado, III-51; Iguazu Cue, XII-51; Duret 1951c, 1952; same collections noted by Castro et al. 1959 (1960).

Note: See note under *Ph. diabolica*.

Phoniomyia quasilongirostris

Distribution: MISIONES: Iguazu, X-27, R.C. Shannon; Puerto Aguirre, no other data; Castro et al. 1959 (1960); Duret 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: This species was listed by Castro et al. 1959 (1960) and Duret (1950a, 1951c) under 2 other names: *Ph. longirostris* (Theobald) from which *quasilongirostris* was resurrected from synonymy by Lane & Cerqueira (1942) and *Ph. neivai* which was synonymized under *quasilongirostris* by Correa and Ramalho (1956).

Phoniomyia tripartita

Distribution: CHACO: Dyar 1928. CORRIENTES: Dyar 1928. PROVINCE NOT SPECIFIED: Duret 1951c; Knight & Stone 1977.

Psorophora (Grabhamia) cingulata

Distribution: BUENOS AIRES: Carcavallo & Martinez 1968a; Prosen et al. 1960. CHACO: Carcavallo & Martinez 1968a. CORRIENTES: Carcavallo & Martinez 1968a. ENTRE RIOS: Carcavallo & Martinez 1968a. MISIONES: Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1952. SANTA FE: Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Records of this species for Chaco, Corrientes and Entre Rios Provinces are based only on the distribution map of Carcavallo & Martinez (1968a).

Psorophora (Grabhamia) confinnis

Distribution: BUENOS AIRES: Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Duret 1951b; Duret 1952; Mitchell et al. 1985c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Psorophora (Janthinosoma) albigena

Distribution: BUENOS AIRES: Casal & Garcia 1970; Duret 1951b; Knight & Stone 1977. FORMOSA: Guedes et al. 1965. MISIONES: Barrera Oro et al. 1966. SANTIAGO DEL ESTERO: Guedes et al. 1965.

Note: This species belongs to the *varipes* complex, along with *Ps. varipes* (Coquillett), *Ps. discrucians* (Walker), and *Ps. mathesonii* Belkin & Heinemann. The group has one distinguishing adult female morphological character in

common, a band of pale scales on hindtarsomere 4, while the other hindtarsomeres are dark-scaled. Guedes & Souza (1964) resurrected *albigenu* from synonymy with *varipes*, and they, along with Knight & Stone (1977) and Peyton et al. (1983) have declared that the species in South America which was previously called "*varipes*" is really *albigenu* and that the identity and distribution of "*varipes*" remains uncertain. *Psorophora mathesonii* is found only in the U.S.A., while *discrucians* is distributed in South America east of the Andes Mountains, including parts of Argentina, and can be distinguished from *albigenu*; see identification keys.

TUCUMAN: Castro et al. 1959 (1960); Duret 1951b. PROVINCE NOT SPECIFIED: Belkin et al. 1968; Knight & Stone 1977.

Note: Belkin et al. (1970) suggested that the "ciliata" from South America, south of the Guianas probably is different from populations to the north. They had no specimens to determine, for example, whether *Ps. lynchi* Brethes was different. Pending further study, *lynchi* will remain a synonym of *ciliata*. The type locality of *lynchi* is Buenos Aires (Belkin et al. 1968; Knight & Stone 1977).

Psorophora (Psorophora) cilipes

Distribution: MISIONES: Iguazu Cue, XI-51, 5F, Duret; Castro et al. 1959 (1960); Duret 1952. PROVINCE NOT SPECIFIED: Duret 1951b; Knight & Stone 1977.

Note: Del Ponte & Castro (1952) stated: "La presencia de *Ps. cilipes* en la Argentina debe, pues, ser demostrada."

Psorophora (Psorophora) holmbergi

Distribution: BUENOS AIRES: Castro et al. 1959 (1960); Del Ponte & Castro 1952; Duret 1951b; Garcia & Casal 1965; Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Del Ponte & Castro 1952; Duret 1951b; Guedes et al. 1965. CORDOBA: Bianchini et al. 1965 (1967). FORMOSA: Belkin et al. 1968; Castro et al. 1959 (1960); Del Ponte & Castro 1952; Duret 1951b; Guedes et al. 1965; Knight & Stone 1977. MISIONES: Castro et al. 1959 (1960); Del Ponte & Castro 1952. SANTA FE: Castro et al. 1959 (1960); Del Ponte & Castro 1952; Duret 1951b; Forattini et al. 1970.

Note: The type locality for this species is City of Formosa, Formosa Province (Del Ponte & Castro 1952; Knight & Stone 1977).

Psorophora (Psorophora) ochripes

Distribution: BUENOS AIRES: Buenos Aires, near Parana River, 1F, Macquart; Belkin (1968); Knight & Stone 1977.

Note: This species is known only from the holotype, whose type locality is listed above. The species was formerly placed in synonymy under *Ae. fulvus* (Stone et al. 1959), but was resurrected by Belkin (1968) as a species of *Psorophora*.

Psorophora (Psorophora) pallescens

Distribution: BUENOS AIRES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Duret 1951b; Forattini et al. 1970; Mitchell et al. 1985b. CORDOBA: Bianchini et al. 1965 (1967), 1968; CORRIENTES: Castro et al. 1959 (1960); Duret 1952; Hack et al. 1978; Mitchell et al. 1985b. ENTRE RIOS: Castro et al. 1959 (1960); Duret 1952. FORMOSA: Castro et al. 1959 (1960); Duret 1951b. SALTA: Castro et al. 1959 (1960); Duret 1951b. SANTA FE: Castro et al. 1959 (1960); Del Ponte & Castro 1952; Duret 1951b; Mitchell et al. 1985a; Mitchell et al. 1985b. SANTIAGO DEL ESTERO: Castro et al. 1959 (1960); Duret 1951b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Psorophora (Psorophora) saeva

Distribution: CHACO: Guedes et al. 1965. FORMOSA: Guedes et al. 1965. MISIONES: Castro et al. 1959 (1960); Del Ponte & Castro 1952; Duret 1951b; Duret 1952; Stone 1967. SALTA: Del Ponte & Castro 1952; Duret 1951b. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: In 1907, Cruz described *Ps. genumaculata*, a species which had already been described as *Ps. saeva* by Dyar & Knab (1906). In 1923, Dyar synonymized both of these names under *Ps. lineata* (Von Humboldt, 1819). The early literature on Argentine mosquitoes refers to *saeva* as either *genumaculata* or *lineata*. Del Ponte & Castro (1952) resurrected *saeva* as the correct name applicable to this species in Argentina, placed *genumaculata* in synonymy under it and considered *lineata* as "nomen dubium." It was Stone (1967) who determined that *lineata* is distinct from *saeva*, and is distributed in Central and Northern South America, while *saeva* has a more southern range.

Runchomyia (Isostomyia) espinii

Distribution: MISIONES: San Antonio, Colonia General Belgrano, 1F; Castro et al. 1959 (1960); Duret 1952; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Runchomyia (Runchomyia) frontosa

Distribution: MISIONES: Bemberg, II-37, 1F; Puerto Iguazu, Cataratas del Iguazu, Puerto Peninsula, various specimens; Obera, El Soberbio, V-2-66, various specimens; Bejarano 1979; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Prior to 1960, this species was called *rapax* Dyar & Knab in the Argentine literature, but actually it was synonymized under *frontosa* by Stone in 1944. Zavortink (1979a) listed *rapax* as a valid species, but without comment.

Runchomyia (Runchomyia) paranensis

Distribution: BUENOS AIRES: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951c; Garcia & Casal 1965; Knight & Stone 1977. CORRIENTES: Castro et al. 1959 (1960); Duret 1951c. MISIONES: Castro et al. 1959 (1960); Duret 1951c.

Note: This species was synonymized under *lunatum* (Theobald) by Lane & Cerqueira (1942) but resurrected by Garcia & Casal (1965). Some of the Argentine literature refers to this species as *lunatum* (*lunatus*).

Runchomyia (Runchomyia) reversa

Distribution: MISIONES: Cataratas del Iguazu, IX-47, 1F, Duret; Iguazu Cue, XI-XII-51, 7Ad, Duret; Castro et al. 1959 (1960); Duret 1951c; Duret 1952. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabettus (Sabettus) albiprivus

Distribution: CORRIENTES: Castro et al. 1959 (1960); Duret 1951c; Duret 1952. JUJUY: Belkin et al. 1968; Casal & Garcia 1970; Castro et al. 1959 (1960); Duret 1951c; Knight & Stone 1977. MISIONES: Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c; Duret 1952; Martinez & Prosen 1951. SALTA: Alvarado et al. 1959 (1960); Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Duret 1951c; Forattini et al. 1970.

Sabethes (Sabethes) belisarioi

Distribution: MISIONES: Iguazu, X-28, 1Ad, Riessel; Arroyo Yacui, X-47; Cataratas del Iguazu, X-48; Puerto Rico, II-51; Deseado, X-48; Duret; Castro et al. 1959 (1960); Duret 1951c; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabethes (Sabethes) cyaneus

Distribution: MISIONES: Castro et al. 1959 (1960). PROVINCE NOT SPECIFIED: Duret 1951c; Knight & Stone 1977.

Sabethes (Sabethes) purpureus

Distribution: MISIONES: Bemberg, II-37; Panambi, III-51, Duret; Castro et al. 1959 (1960); Duret 1951c. SANTA FE: Reconquista, XI-41; Duret 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabethes (Sabethinus) aurescens

Distribution: MISIONES: Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c; Duret 1952; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabethes (Sabethinus) identicus

Distribution: MISIONES: Cataratas del Iguazu, X-48; Bernardo de Irigoyen, X-48; Parambi, V-49; Duret; Castro et al. 1959 (1960); Duret 1951c; Martinez & Prosen 1951. SALTA: Salvador Mazza (Pocitos), X-51, 1F; Castro et al. 1959 (1960); Martinez & Prosen 1953c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: This species was listed by its synonym, *Sa. lutzianus* Lane & Cerqueira, by Duret (1951c) and Martinez & Prosen (1951).

Sabethes (Sabethinus) intermedius

Distribution: MISIONES: Arroyo Yacui, IX-47; Puerto y Cataratas del Iguazu, X-47; Panambi, V-49; Deseado, III-51; Colonia General Belgrano, X-50; Castro et al. 1959 (1960); Duret 1951c; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabethes (Sabethinus) melanonymphe

Distribution: MISIONES: San Pedro, III-13-66, 1lar; III-16-66, 2M1p, 1lar; Garcia & Casal 1968a. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabethes (Sabethinus) soperi

Distribution: MISIONES: Puerto Izuazu, X-6-47, 1F, Duret; Puerto Esperanza, III-51; Castro et al. 1959 (1960); Duret 1949, 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Sabethes (Sabethinus) undosus

Distribution: MISIONES: Puerto Iguazu, X-47, 1F, Bejarano & Duret; Castro et al. 1959 (1960); Duret 1951c.

Note: Not listed from Argentina by Knight & Stone (1977).

Sabethes (Sabethoides) chloropterus

Distribution: MISIONES: Alvarado et al. 1959 (1960); Bejarano 1979; Carcavallo & Martinez 1968a; Castro et al. 1959 (1960); Duret 1951c; Duret 1952; Martinez & Prosen 1951. SALTA: Carcavallo & Martinez 1968a; Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Forattini et al. 1970; Martinez & Prosen 1953c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Martinez & Prosen (1951) and Duret (1951c) used the name, *Sa. imperfectus*, (Bonne-Wepster & Bonne) for this species. It was synonymized under *chloropterus* by Lane (1951).

Shannoniana fluviatilis

Distribution: MISIONES: Campo Grande, X-48; Iguazu, XI-51, 5F, Duret; San Pedro, III-66, 256F; Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c, 1952. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Toxorhynchites (Ankylorhynchus) purpureus

Distribution: MISIONES: El Soberbio; Castro et al. 1959 (1960).

Note: Knight & Stone (1977) recorded this species only from Brazil.

Toxorhynchites (Lynchiella) bambusicolus

Distribution: MISIONES: San Pedro, III-16-66, 1F, 3M; Garcia & Casal 1968b.

Note: Not reported from Argentina by Knight & Stone (1977).

Toxorhynchites (Lynchiella) cavalieri

Distribution: MISIONES: Hosteria Ruffino, Puerto Iguazu, VI-25-65, 1Flp, Casal, Hepper & Garcia; Belkin et al. 1968; Garcia & Casal 1967; Knight & Stone 1977; Steffan 1977.

Note: The type locality is given above.

Toxorhynchites (Lynchiella) guadeloupensis

Distribution: CATAMARCA: Forattini et al. 1970. JUJUY: Castro et al. 1959 (1960); Duret 1950c. SALTA: Castro et al. 1959 (1960); Duret 1950c; Martinez et al. 1959. TUCUMAN: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1950c; Forattini et al. 1970; Knight & Stone 1977; Steffan 1977.

Note: Earlier Argentine literature referred to this species as either *Tx. tucumanus* Brethes or *Tx. arborealis* Shannon & Del Ponte, both of which were synonymized by Lane (1953) with *guadeloupensis*.

Toxorhynchites (Lynchiella) h. haemorrhoidalis

Distribution: PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Since all mention of *Tx. haemorrhoidalis* in the Argentine literature gives only subspecies *separatus*, it is doubtful that the typical subspecies occurs in Argentina. This opinion was also expressed by Duret (1950c).

Toxorhynchites (Lynchiella) h. separatus

Distribution: CHACO: Castro et al. 1959 (1960); Duret 1950c. FORMOSA: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1950c; Knight & Stone 1977; Steffan 1977.

Note: An adult male from Formosa Province was designated as the lectotype of this taxon by Casal (see Belkin et al. 1968).

Toxorhynchites (Lynchiella) solstitialis

Distribution: MISIONES: Puerto Aguirre; Castro et al. 1959 (1960); Duret 1950c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Toxorhynchites (Lynchiella) theobaldi

Distribution: MISIONES: Puerto Iguazu, IV-8-46, Umana; Puerto Aguirre, no other data; Castro et al. 1959 (1960); Duret 1950c. SALTA: La Lagunas, 2F, 1M; Forattini et al. 1970. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Trichoprosopon castroi

Distribution: MISIONES: Puerto Peninsula, XI-II-51, 1M, Duret; San Pedro, III-66, 279F; Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1952.

Note: Knight & Stone (1977) reported this species only from Brazil.

Trichoprosopon compressum

Distribution: MISIONES: Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c; Duret 1952; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Trichoprosopon obscurum

Distribution: MISIONES: San Antonio (General Belgrano), X-51, series of F; Castro et al. 1959 (1960); Martinez & Prosen 1953c; PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Trichoprosopon pallidiventer

Distribution: MISIONES: Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c; Duret 1952; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Trichoprosopon simile

Distribution: MISIONES: Bemberg, X-48, 1F, Duret & Bejarano; Castro et al. 1959 (1960); Duret 1951c.

Note: Not recorded from Argentina by Knight & Stone (1977).

Uranotaenia (Uranotaenia) apicalis

Distribution: BUENOS AIRES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Garcia & Casal 1965; Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Duret 1950c; Duret 1952. CORRIENTES: Castro & Garcia 1959 (1960); Castro et al. 1959 (1960); Hack et al. 1978. FORMOSA: Castro et al. 1959 (1960); Duret 1950c. SANTA FE: Castro et al. 1959 (1960); Duret 1950c. PROVINCE NOT SPECIFIED: Galindo et al. 1954; Knight & Stone 1977.

Uranotaenia (Uranotaenia) davisi

Distribution: FORMOSA: Puerto Pilcomaya, II-20-46; Castro et al. 1959 (1960); Duret 1950c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Uranotaenia (Uranotaenia) ditaenionota

Distribution: MISIONES: Aristobulo del Valle, II-III-51; Castro et al. 1959 (1960); Duret 1952. SALTA: Pocitos, IX-49, II-51, Martinez; Castro et al. 1959 (1960); Duret 1950c, 1952. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Uranotaenia (Uranotaenia) geometrica

Distribution: BUENOS AIRES: Castro et al. 1959 (1960); Duret 1950c; Prosen et al. 1960. CHACO: Castro et al. 1959 (1960); Duret 1950c. CORRIENTES: Castro et al. 1959 (1960); Duret 1950c; Duret 1952. ENTRE RIOS: Castro et al. 1959 (1960); Duret 1950c. MISIONES: Castro et al. 1959 (1960); Duret 1952. SANTA FE: Castro et al. 1959 (1960). PROVINCE NOT SPECIFIED: Knight & Stone 1977; Lane 1953.

Uranotaenia (Uranotaenia) lanei

Distribution: FORMOSA: Ciudad de Formosa, III-1-49, 1F, Prosen & Martinez; Belkin et al. 1968; Castro et al. 1959 (1960); Knight & Stone 1977; Martinez & Prosen 1953a; Prosen & Martinez 1953.

Note: The type locality is given above.

Uranotaenia (Uranotaenia) lowii

Distribution: BUENOS AIRES: Prosen et al. 1960. CHACO: Belkin et al. 1968; Duret 1950c; Knight & Stone 1977. CORRIENTES: Castro et al. 1959 (1960); Duret 1950c; Duret 1952; Hack et al. 1978; Knight & Stone 1977. FORMOSA: Castro et al. 1959 (1960); Duret 1950c. TUCUMAN: Castro et al. 1959 (1960); Duret 1950c. PROVINCE NOT SPECIFIED: Galindo et al. 1954.

Note: The type locality of the typical species is Las Conchas, Buenos Aires Province (Knight & Stone 1977). A valid subspecies, *elnora* Paterson & Shannon, was described in 1927 from an adult female collected in Tres Posos, Embarcacion, Salta Province. The distribution records given above for *pulcherrima* (var. *pulcherrima*) include those for var. *elnora*. Older references called this species *Ur. urania* Shannon & Del Ponte which was synonymized under *pulcherrima* by Lane (1951).

Wyeomyia (Davismyia) petrocchiae

Distribution: FORMOSA: Belkin et al. 1968. JUJUY: Castro et al. 1959 (1960); Duret 1951c. MISIONES: Castro et al. 1959 (1960); Duret 1951c; Duret 1952. TUCUMAN: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951c; Knight & Stone 1977.

Note: The type locality for this species is Raco, Tucuman Province, according to Knight & Stone (1977) and Lane (1953).

Wyeomyia (Dendromyia) aporonoma

Distribution: MISIONES: San Pedro, III-10-66, 2F; Garcia & Casal 1968a. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Wyeomyia (Dendromyia) belkini

Distribution: MISIONES: Arroyo Ibicuy, 20 km W of Cataratas del Iguazu, VI-26-65, 1M, 7F, 5L, Hepper, Garcia & Casal; San Pedro, III-66, 3F; Berrera Oro et al. 1966; Belkin et al. 1968; Casal & Garcia 1966; Knight & Stone 1977.

Note: The type locality for this species is Arroyo Ibicuy as listed above under distribution (Casal & Garcia 1966).

Wyeomyia (Dendromyia) luteoventralis

Distribution: CORRIENTES: Arroyo Cuay Chico, IV-51; San Benito, no other data; Castro et al. 1959 (1960); Duret 1952; MISIONES: Cataratas del Iguazu, IX-47; Cerro Azul, V-49; Arroyo Piray-Guazu, Deseado, Puerto Laharrague, Arroyo Yacui, El Soberbio, no other data; Castro et al. 1959 (1960); Duret 1951c, 1952.

Note: This species was not reported from Argentina by Knight & Stone (1977) nor by Lane (1953). It was listed under the name *Wy. quasiluteoventralis* Theobald by Castro et al. 1959 (1960) and Duret (1951c, 1952), however that taxon was synonymized under *luteoventralis* by Belkin (1968). Another species erroneously identified as this species was *Wy. scotinomus* (Dyar & Knab) by Duret (1951c). The error was corrected by Duret (1952) and noted by Castro 1959 (1960).

Wyeomyia (Dendromyia) melanocephala

Distribution: JUJUY: Ledesma, III-9-26, 1F, Davis & Shannon; Leach, XII-48; Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951c; Knight & Stone 1977. SALTA: Luis Burela, El Tunal, XI-48; Castro et al. 1959 (1960); Duret 1951c.

Wyeomyia (Dendromyia) mystes

Distribution: MISIONES: Iguazu, XI-16-51, 1M, Duret; Castro et al. 1959 (1960); Duret 1952.

Note: This species was not recorded from Argentina by Knight & Stone (1977).

Wyeomyia (Dendromyia) personata

Distribution: MISIONES: El Soberbio, X-48; Dos de Mayo, X-48; Iguazu, XII-51; Helechos (Arroyo San Ramon), V-49; Aristobulo del Valle, Panambi (no other data); Castro et al. 1959 (1960); Duret 1951c, 1952. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: Duret (1952) referred to this species by its synonymized name, *Wy. brucei* Del Ponte & Cerqueira, which was synonymized by Da Costa Lima (1943).

Wyeomyia (Dendromyia) serratoria

Distribution: MISIONES: Iguazu; Dyar 1928. PROVINCE NOT SPECIFIED: Castro et al. 1959 (1960); Knight & Stone 1977.

Wyeomyia (Menolepis) leucostigma

Distribution: BUENOS AIRES: Castro et al. 1959 (1960); Duret 1951c; Knight & Stone 1977; Prosen et al. 1960. CORRIENTES: Castro et al. 1959 (1960); Duret 1951c. ENTRE RIOS: Duret 1951c. JUJUY: Castro et al. 1959 (1960); Duret 1951c. MISIONES: Castro et al. 1959 (1960); Duret 1951c; Martinez & Prosen 1951. SANTIAGO DEL ESTERO: Castro et al. 1959 (1960); Duret 1951c. TUCUMAN: Castro et al. 1959 (1960); Duret 1951c. PROVINCE NOT SPECIFIED: Lane, 1953.

Wyeomyia (Nunezia) lateralis

Distribution: JUJUY: Belkin et al. 1968; Castro et al. 1959 (1960); Duret 1951c; Knight & Stone 1977; Lane 1953. SALTA: Castro et al. 1959 (1960); Duret 1951c. TUCUMAN: Castro et al. 1959 (1960); Duret 1951c. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Note: The type locality for this species is Zapla, Jujuy Province (Knight & Stone, 1977).

Wyeomyia (Wyeomyia) arthrostigma

Distribution: SALTA: Pescado, XI-24-66, 8F, 8M, 1Flp, 1Mlp, Garcia & Casal; Garcia & Casal 1968b.

Note: Not listed from Argentina by Knight & Stone (1977).

Wyeomyia (Wyeomyia) codiocampa

Distribution: MISIONES: El Dorado, VII-8-65, 1M, Garcia & Casal; Garcia & Casal 1968b.

Note: This species was recorded only from Panama, Brazil and Paraguay by Knight & Stone (1977).

Wyeomyia (Wyeomyia) limai

Distribution: MISIONES: San Antonio, Colonia General Belgrano, X-50, many F; Arroyo Piray-Guazu, IX-48; Cataratas del Iguazu, X-48; San Pedro, III-66, 15F; Aristobulo del Valle, Campo Grande, Colonia Salto Encantado, Dos de Mayo, El Soberbio, Los Helechos, Panambi, Puerto Esperanza, Santo Pipo, Tobunas, (no other data); Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c; Martinez & Prosen 1951. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Wyeomyia (Wyeomyia) lutzi

Distribution: MISIONES: Iguazu, X-51, various larvae, Duret; Castro et al. 1959 (1960); Duret 1952.

Note: Knight & Stone (1977) recorded this species only from Brazil.

Wyeomyia (Wyeomyia) obliterata

Distribution: MISIONES: Deseado, III-51; Cataratas del Iguazu, XI-51; San Pedro, III-66, 2F; Barrera Oro et al. 1966; Castro et al. 1959 (1960); Duret 1951c, 1952.

Note: Not listed from Argentina by Knight & Stone (1977).

Wyeomyia (Wyeomyia) sabethaea

Distribution: MISIONES: San Pedro, III-9-65, 1F; III-66, 15F; El Dorado, 10 km S. in Arroyo Piray-Guazu, VII-6-65, 2F; Barrera Oro et al. 1966; Garcia & Casal 1968a. PROVINCE NOT SPECIFIED: Knight & Stone 1977.

Wyeomyia (Wyeomyia) serrata

Distribution: MISIONES: Deseado, III-30-51, lar; Castro et al. 1959 (1960); Duret 1952.

Note: Knight & Stone (1977) reported this species only from Brazil.

INDEX TO GENERA, SUBGENERA AND SPECIES

FOR PARTS I AND II*

Names in script are valid species occurring in Argentina: their page numbers in roman type refer to identification keys in English, those in alde English type, to keys in Spanish. Numbers preceding the slant line(/) indicate adult female keys while those following it, larval keys. Numbers in script refer to the geographic distribution in Part II. Names in roman type are valid species currently unknown from Argentina or are synonyms of valid Argentine species. Their page numbers denote mention in the text.
